## High Performance Bridge Deck Systems

## Bridge Deck Systems

# Traffideck®

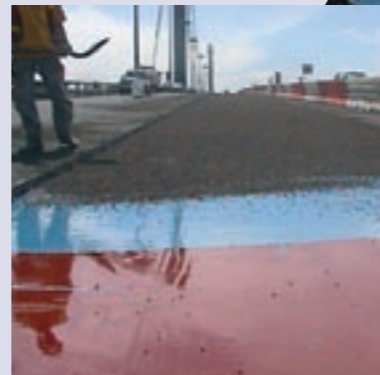

WATERPROOFING AND ANTI-SLIP SURFACING SYSTEMS

Traffideck waterproofing and surfacing systems offer specifiers and installers a unique alternative to traditional waterproofing techniques; the systems have been researched and developed with the following objectives in mind:

- Quick to apply
- Fast return to service
- Application at low temperatures
- Odorless
- Solvent free
- Instant setting membrane
- Can be used on Steel, Concrete and Wood

Each individual component has been developed with environmentally friendly considerations in mind, and is zero VOC and SCAQMD Rule 1113 compliant. They are truly innovative using cutting edge technology.

- Open to traffic within 2 hours
- No smell
- Year round application
- Less temperature dependant
- High build system will accommodate rough surfaces
- Incorporates shear coat for strong asphalt bond
- High impact resistance
- Outstanding skid and wear resistance

As the interpreter between the chemical and engineering industry, Dow Hyperlast provide customised polyurethane elastomers to make your ideas happen.

Dow Hyperlast's strength lies in investment; in production, research, testing, training, and most importantly, in its customers.

This company continues to succeed because of its valuable heritage of unique information and expertise which has been created as the company developed its own calibre of technical specialists. Dow Hyperlast is able to draw on this wealth of knowledge to respond to individual needs.

Teams of specialists are committed to achieve innovative solutions with a practical dimension.

Dow Hyperlast's commitment to customers is underlined by emphasis on quality. This is achieved through attainment of industry standards. Dow Hyperlast is an ISO 9001 and QS-9000 approved company.

With over 30 years experience, Dow Hyperlast has evolved and expanded to become a leading independent systems house.
